Project Title	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposed project aims to analyze food ordering data using Tableau to understand customer behavior, order trends, cuisine preferences, and delivery performance. It transforms raw data into interactive dashboards that help businesses make data-driven decisions, improve operational efficiency, enhance customer satisfaction, and identify opportunities for business growth.

Project Overview	
Objective	To analyze food ordering data using Tableau and identify customer behavior, order trends, cuisine preferences, delivery performance, and city-wise demand to support data-driven business decisions
Scope	The project analyzes food ordering data from Excel/CSV datasets using Tableau dashboards. It provides insights into order value, delivery time, meal type, cuisine, city-wise demand, and customer preferences to improve business performance and operational efficiency.
Problem Statement	
Description	Food delivery businesses generate large volumes of data but often struggle to identify customer preferences, peak ordering periods, delivery delays, and high-demand locations. Manual analysis is time-consuming and limits effective decision-making.
Impact	Without proper analysis, businesses may experience inefficient operations, delayed deliveries, lower customer satisfaction, and missed revenue opportunities.
Proposed Solution	
Approach	Use Tableau to preprocess, analyze, and visualize food ordering data through interactive dashboards. The dashboards provide insights into customer behavior, delivery performance, cuisine popularity, and business trends.
Key Features	- Interactive Tableau dashboards - Customer behavior analysis - Cuisine and meal type analysis

	• City-wise demand analysis • Delivery time analysis • Order value and revenue insights

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	Processor	Intel Core i3/i5 or Ryzen equivalent
Memory	RAM	8 GB
Storage	Disk Space	10 GB SSD free space
Software		
Frameworks	Business Intelligence Tool	Tableau Desktop / Tableau Public
Libraries	Data Analysis	Tableau, Microsoft Excel
Development Environment	Operating System	Windows 10/11 or macOS
Data		
Data	Source, size, format	Food Ordering Dataset, Excel (.xlsx) / CSV
