

Solution Architecture

Date	09-07-2026
Team ID	SWTID-2026-2426
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	5 Marks

Solution Architecture Diagram:

Component Description Table

Component Name	Description / Role in Architecture	Technologies Used
 Presentation Layer	Displays interactive dashboards, charts, KPIs and filters for users to analyze food ordering behavior and consumer trends.	Tableau Desktop / Tableau Public
 API Gateway	Not applicable for this project as data is processed directly in Tableau.	N/A
 Core Logic Service	Performs data cleaning, data transformation, analysis, KPI calculations and creates visualizations in Tableau.	Tableau, Microsoft Excel
 External API Integrations	Connects to data source files (Excel/CSV) for importing food ordering data.	Microsoft Excel, CSV Files
 Database (Data Layer)	Stores raw food ordering data used for analysis and dashboard creation.	Excel (.xlsx), CSV Files
