

Project Initialization and Planning Phase

Date	09-07-2026
Team ID	SWTID-2026-2426
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	3 Marks

Define Problem Statements :

The food delivery industry generates large amounts of customer and order data, but businesses often struggle to understand customer ordering behaviour, spending patterns, cuisine preferences, and delivery performance. Without structured analysis, it becomes difficult to identify demand trends, optimize operations, improve customer satisfaction, and make informed business decisions. This project uses Tableau dashboards to analyze food ordering data and provide actionable insights that help businesses enhance customer experience, operational efficiency, and revenue growth.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Business Analyst analyzing food ordering data	Analyze customer ordering behaviour and identify sales trends.	Large amounts of food ordering data are difficult to understand.	The data is scattered and lacks interactive visualizations.	confident about making better business decisions using data insights.
