

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story Points)

Date	18 July 2026
Team ID	SWTID-2026-2426
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Data Collection	USN-1	As a business analyst, I want to collect food order data (Order ID, Order Value, Delivery Fee, Cuisine, Meal Type, City, Time Taken) from the source system so that it can be analysed.	3	High	Srichaitra Gorentla
Sprint-1		USN-2	As a data analyst, I want to export the collected data into CSV/Excel format so that it can be imported into Tableau.	2	High	Srichaitra Gorentla
Sprint-1	Data Cleaning & Preprocessing	USN-3	As a data analyst, I want to remove duplicate and missing records from the dataset so that the analysis is accurate.	3	High	Srichaitra Gorentla
Sprint-1		USN-4	As a data analyst, I want to standardize date and time formats for delivery time fields so that calculations are consistent.	2	Medium	Srichaitra Gorentla
Sprint-1	Data Modeling in Tableau	USN-5	As a data analyst, I want to connect the cleaned dataset to Tableau Desktop so that I can begin building visualizations.	3	High	Srichaitra Gorentla
Sprint-1		USN-6	As a data analyst, I want to create calculated fields (e.g. delivery time buckets) so that dashboards can show meaningful groupings.	2	Medium	Srichaitra Gorentla
Sprint-2	Dashboard Design - Order & Revenue	USN-7	As a business analyst, I want a dashboard showing order value trends by meal type so that I can identify high-revenue segments.	3	High	Srichaitra Gorentla
Sprint-2		USN-8	As a business analyst, I want to visualize order volume over time so that I can track demand trends.	2	Medium	Srichaitra Gorentla
Sprint-2	Dashboard Design - City & Cuisine Trends	USN-9	As a business analyst, I want a dashboard showing top-performing cities and high-demand cuisines so that I can identify strong markets.	3	High	Srichaitra Gorentla
Sprint-2		USN-10	As a business analyst, I want to see cuisine preference breakdowns by city so that offerings can be tailored to local demand.	2	Low	Srichaitra Gorentla
Sprint-3	Dashboard Design - Delivery Performance	USN-11	As an operations manager, I want a dashboard showing delivery time distribution by city so that I can identify delays.	3	High	Srichaitra Gorentla
Sprint-3		USN-12	As an operations manager, I want to see peak mealtime order volumes so that I can plan staffing and resources.	3	High	Srichaitra Gorentla
Sprint-3	Testing & Validation	USN-13	As a reviewer, I want to validate dashboard calculations against raw data so that the insights shown are accurate.	2	Medium	Srichaitra Gorentla

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-4	Final Presentation & Documentation	USN-14	As a team member, I want to compile the dashboards into a final presentation with key insights so that stakeholders can review the findings.	3	High	Srichaitra Gorentla

Project Tracker, Velocity & Burndown Chart (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	15	6 Days	21 Jun 2026	26 Jun 2026	15	26 Jun 2026
Sprint-2	10	6 Days	29 Jun 2026	04 Jul 2026	10	04 Jul 2026
Sprint-3	8	6 Days	06 Jul 2026	11 Jul 2026	8	11 Jul 2026
Sprint-4	3	3 Days	13 Jul 2026	15 Jul 2026	3	15 Jul 2026

Velocity:

Velocity is the average number of story points a team completes per sprint, calculated from past sprints. For example, with a 6-day sprint duration and a completed velocity of 15 story points in Sprint-1, the team's average velocity (AV) per iteration unit (story points per day) is:

$AV = \text{Sprint Duration} \div \text{Velocity} = 6 \div 15 \approx 0.4 \text{ days per story point (i.e. Velocity} = 2.5 \text{ story points/day)}$

Burndown Chart:

A burndown chart is a graphical representation of work left to do versus time. It is used to track the remaining story points across Sprint-1 to Sprint-4 for this project and to identify whether the team is on track to complete the planned backlog by the release date.
