

Project Design Phase II

Brainstorm&IdeaPrioritization Template

Date	18 July 2026
Team ID	SWTID-2026-2426
Project Name	Food Ordering Behaviour and Consumer Trends: A Structured Analysis of Choices and Habits
Team Members	Gorentla Sri Chaitra, Chandhana K
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

This template was used by the team to brainstorm and prioritize research directions for the project on food ordering behaviour and consumer trends, so the team could shape the study's focus areas collaboratively.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team gathering

Participants: Gorentla Sri Chaitra and Chandhana K. Both team members joined the session, shared prior knowledge of food delivery platforms (Swiggy, Zomato, Uber Eats), and agreed on the scope of the study before brainstorming began.

Set the goal

The team focused on identifying the key behavioural patterns, decision factors, and habits that shape how consumers choose and use food ordering platforms.

Define your problem statement

PROBLEM

How might we identify and structure the key behavioural patterns, influencing factors, and habits that shape consumer choices in food ordering, in order to build a clear analytical understanding of trends in the industry?

Key rules of brainstorming

Stay on topic.

Defer judgment.

Encourage wild ideas.

Listen to others.

Go for volume.

Be specific and visual.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm

Each team member wrote down ideas addressing the problem statement individually before grouping.

Sri Chaitra

Order frequency: weekly vs monthly habits

Weekday vs weekend ordering patterns

Price sensitivity & discount/coupon usage

Influence of online reviews & ratings

Delivery time expectations & satisfaction

Impact of festive/seasonal offers

Health-consciousness in menu choices

Chandhana

Preferred platform: Swiggy / Zomato / Uber Eats

Subscription usage: Swiggy One, Zomato Gold

Payment method preference: UPI, COD, wallet

Social media & influencer impact on choices

Age-group variation in ordering behaviour

Restaurant loyalty & repeat ordering habits

Impact of weather/mood on ordering decisions

Group ideas

The team clustered the individual sticky notes into related themes and gave each cluster a sentence-like label.

Ordering Frequency & Timing Patterns

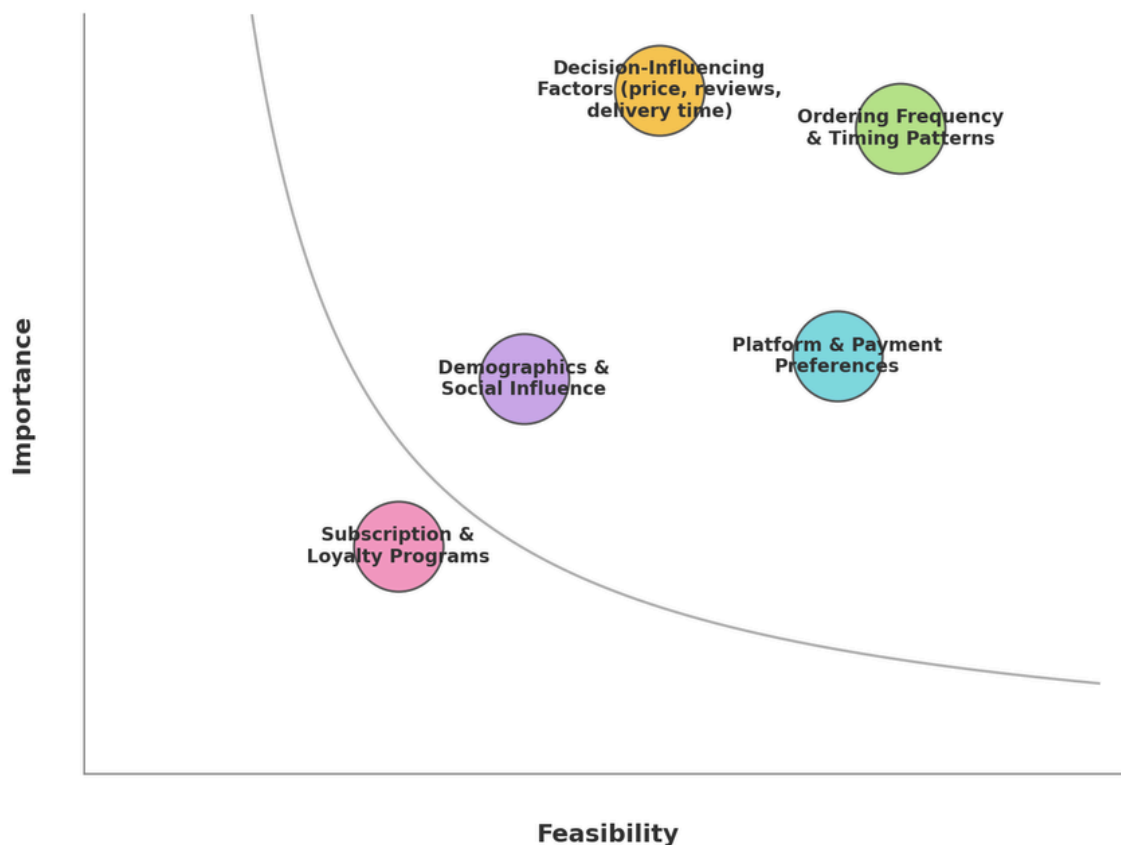

How often, when, and under what conditions (weekday/weekend, weather, festivals) consumers order food.

Decision-Influencing Factors	Price sensitivity, discounts, reviews/ratings, delivery time, and health-consciousness that shape choices.
Platform & Payment Preferences	Choice of ordering platform and preferred payment methods (UPI, COD, wallets).
Demographics & Social Influence	Age-group variation, social media/influencer impact, and restaurant loyalty behaviour.
Subscription & Loyalty Programs	Usage of subscription plans such as Swiggy One and Zomato Gold, and repeat-order habits.

Step-3: Idea Prioritization

Prioritize

The team placed each idea cluster on the grid below to determine which themes are most important to the research and most feasible to study within the project's scope.

Based on the matrix, **Ordering Frequency & Timing Patterns** and **Decision-Influencing Factors** were identified as the highest-priority themes (high importance, high feasibility) and will form the core focus of the structured analysis. **Platform & Payment Preferences** and **Demographics & Social Influence** will be studied as supporting themes, while **Subscription & Loyalty Programs** will be treated as a secondary angle given its lower feasibility within the project timeline.
